

SEMINAR

**Friday, June 11, 2010
1:30 – 3:00 pm**

Seminar Room 4080 AIR Building

TAKING THE 'ACTION' OUT OF CLIMATE ACTION PLANS

**Debbie Niemeier
Professor, Civil and Environmental Engineering
University of California, Davis**

This seminar will discuss on-going work in the area of energysched development and its associated regulatory structures and land use implications. Specifically, the talk will focus on the concept of a regional energysched and examine the ways in which social, jurisdictional, and regulatory constraints present clear and frequently unnecessary hurdles to reducing energy use.
